

Selective Collection Of The Organic Waste In Tourist Areas

Project
funded by the
EUROPEAN UNION

SCOW

Technical Workshop Results of the Survey on food waste management

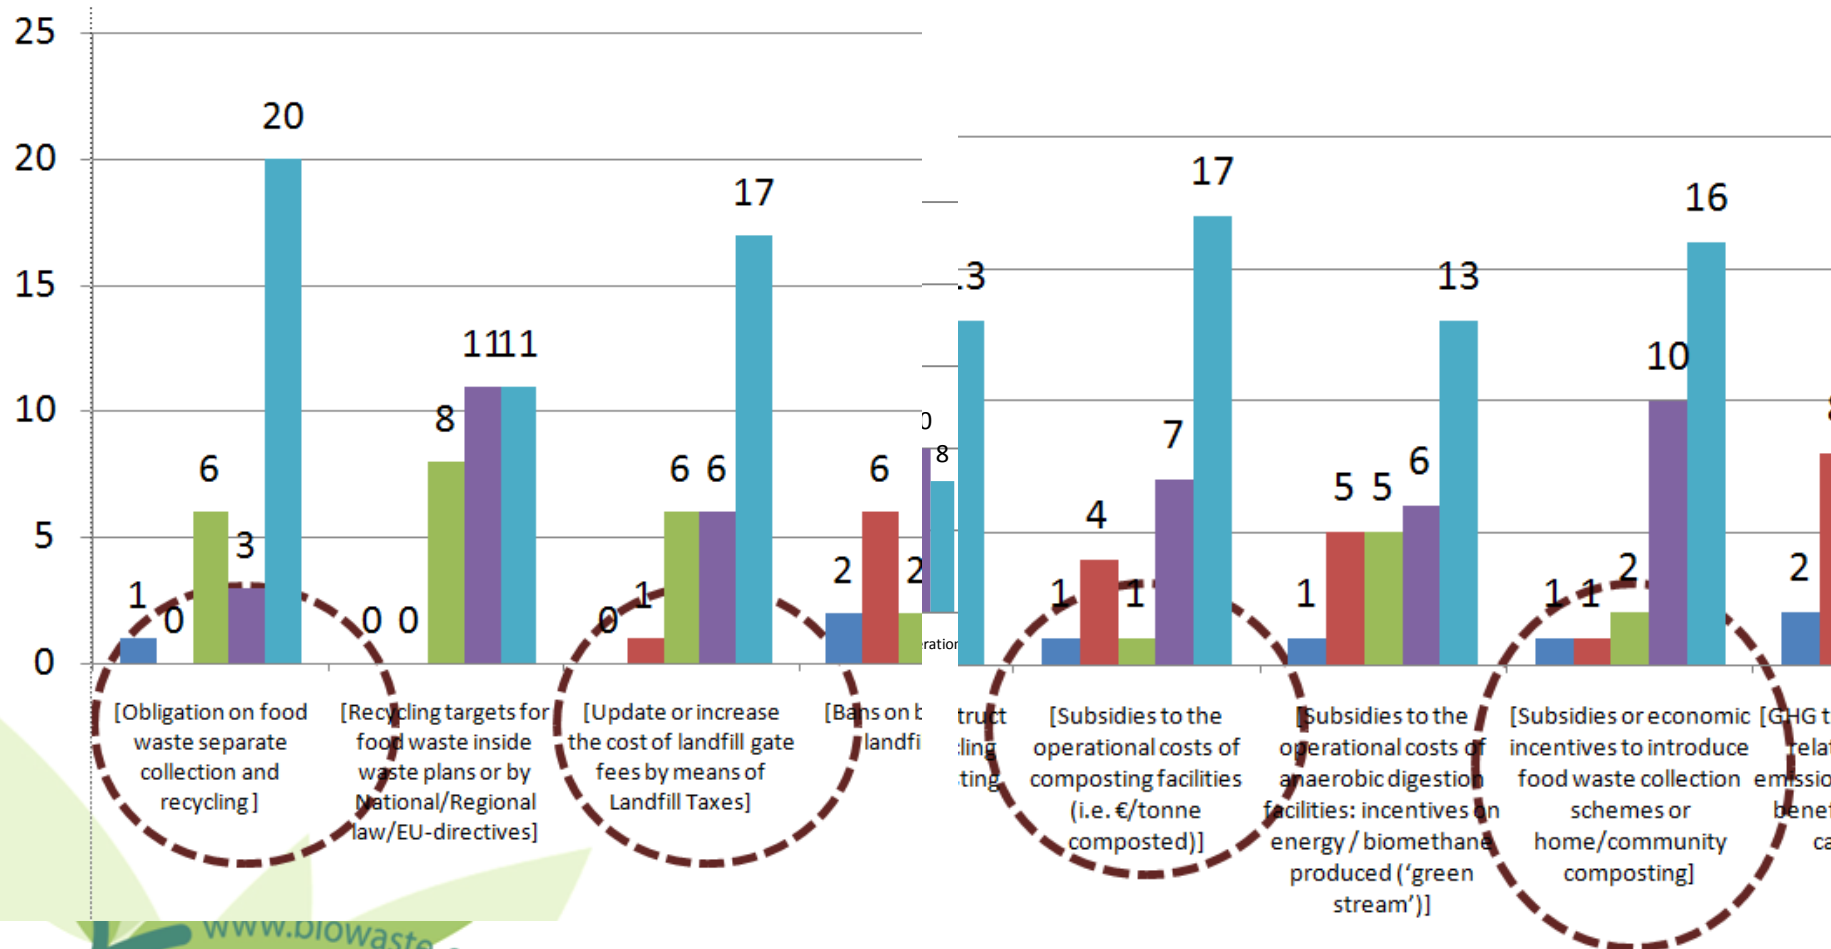

25th February 2015, Barcelona

Agència
d'Ecologia Urbana
de Barcelona

1 - Which drivers can be most effective at country/regional level to obtain good food waste management system in terms of quality and quantity?

www.biowaste-scow.eu

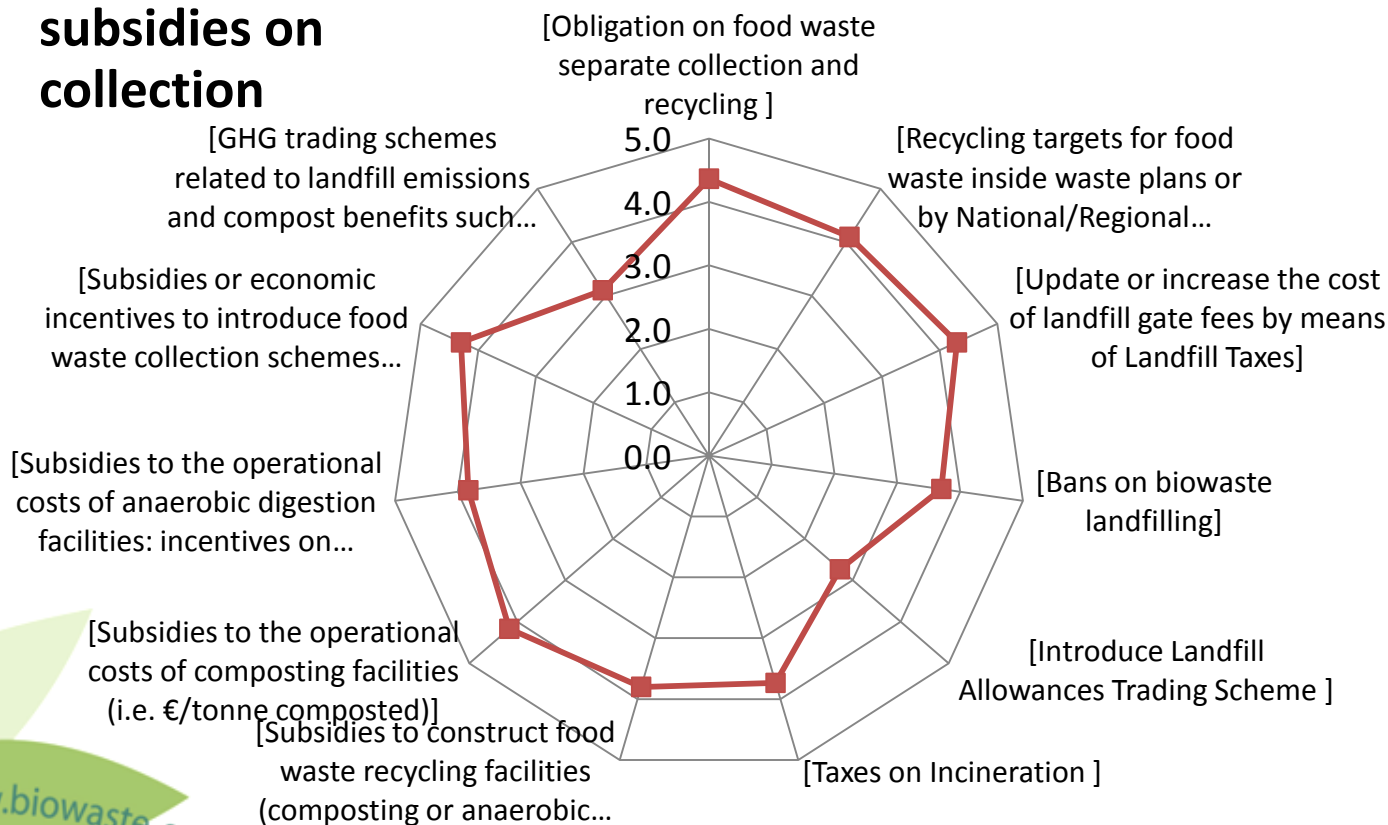

Selective Collection
Of The Organic Waste In Tourist Areas

1 - Which drivers can be most effective at country/regional level to obtain good food waste management system in terms of quality and quantity?

Obligations, Landfill taxes, subsidies on operational costs, subsidies on collection

www.biowaste-scow.eu

2 - Which targets should be introduced for evaluating food waste management by 2020 at country or regional level?

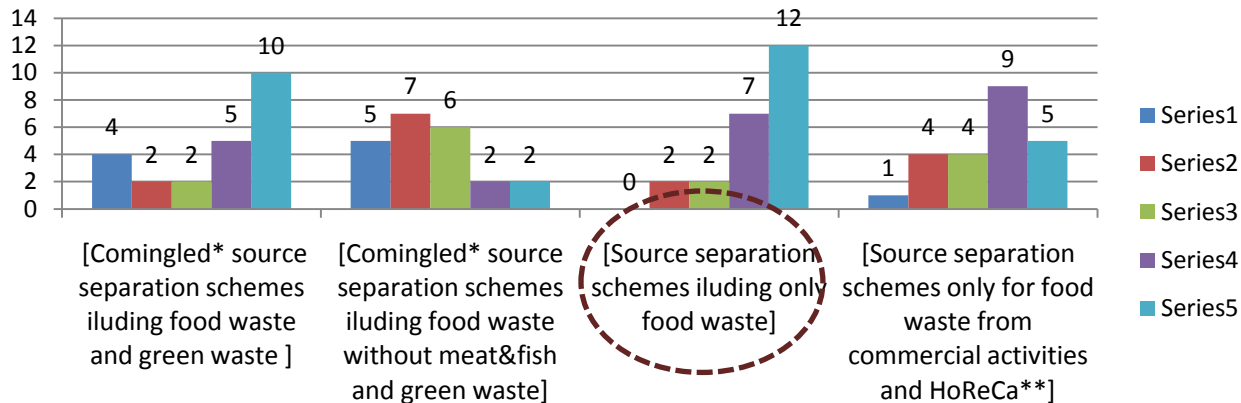

2a) % of food waste prevention with respect to estimated generation for North MC.	2aII) % of food waste prevention with respect to estimated generation for South MC.	2bI) Food waste separate collection (kg/capita/year) for North MC.	2bII) Food waste separate collection (kg/capita/year) for South MC.	2cI) % of food waste selective collection on estimated generation for North MC.
30-50%	10-20%	70-100	60-120	70-90%

2cII) % of food waste selective collection on estimated generation for South MC.	2dI) % of organic waste in residual waste (food waste + vegetal fraction) for North MC.	2dII) % of organic waste in residual waste (food waste + vegetal fraction) for South MC.	2eI) % impurities in separate food waste collection for North MC.	2eII) % impurities in separate food waste collection for South MC.
30-60%	<10-20%	<20-50%	< 5%	< 15-20%

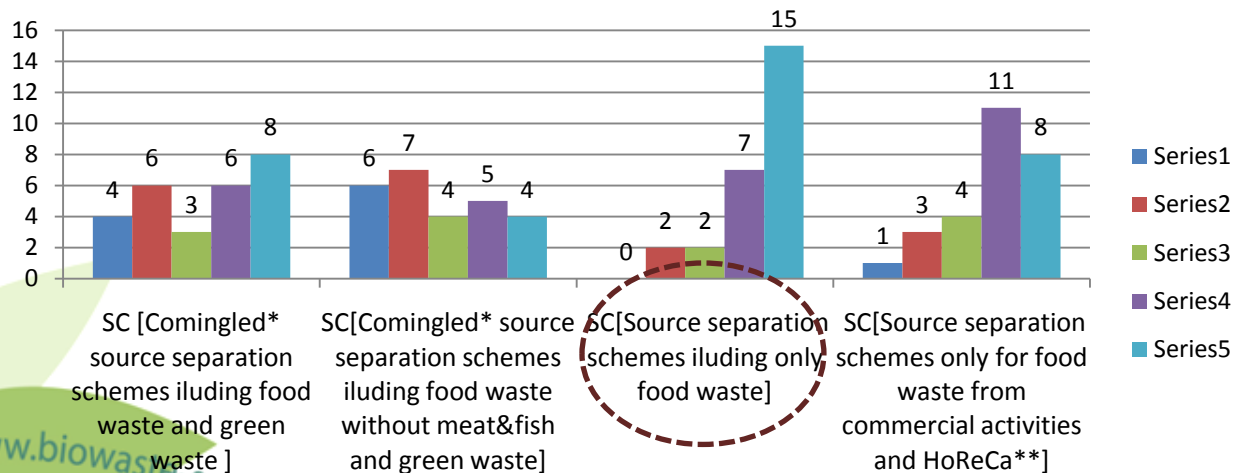

www.biowaste-scow.eu

3 - Which models for separate collection are most appropriate to obtain good quality and high quantities of food waste ?

North Countries

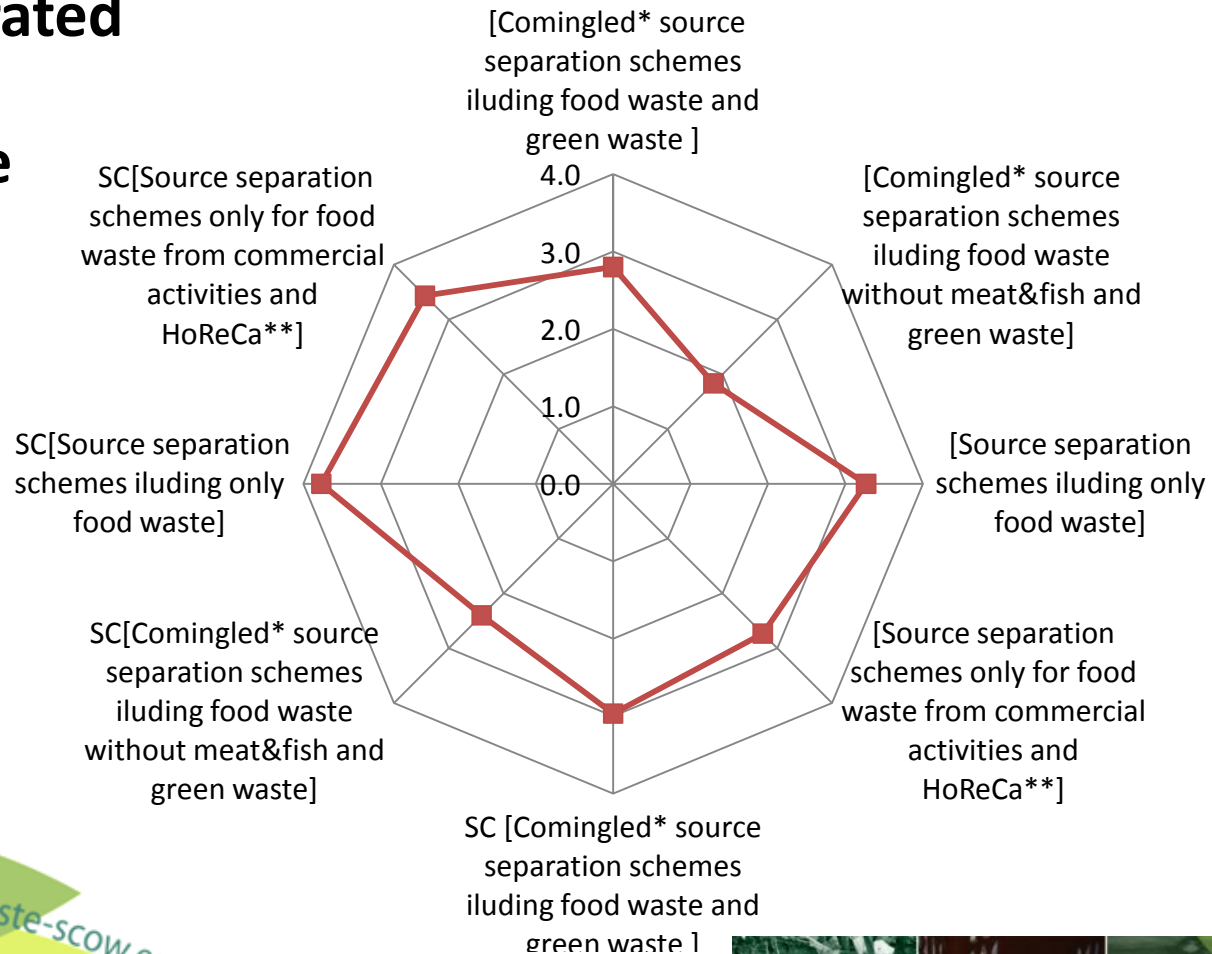

South Countries

www.biowaste-scow.eu

3 - Which models for separate collection are most appropriate to obtain good quality and high quantities of food waste?

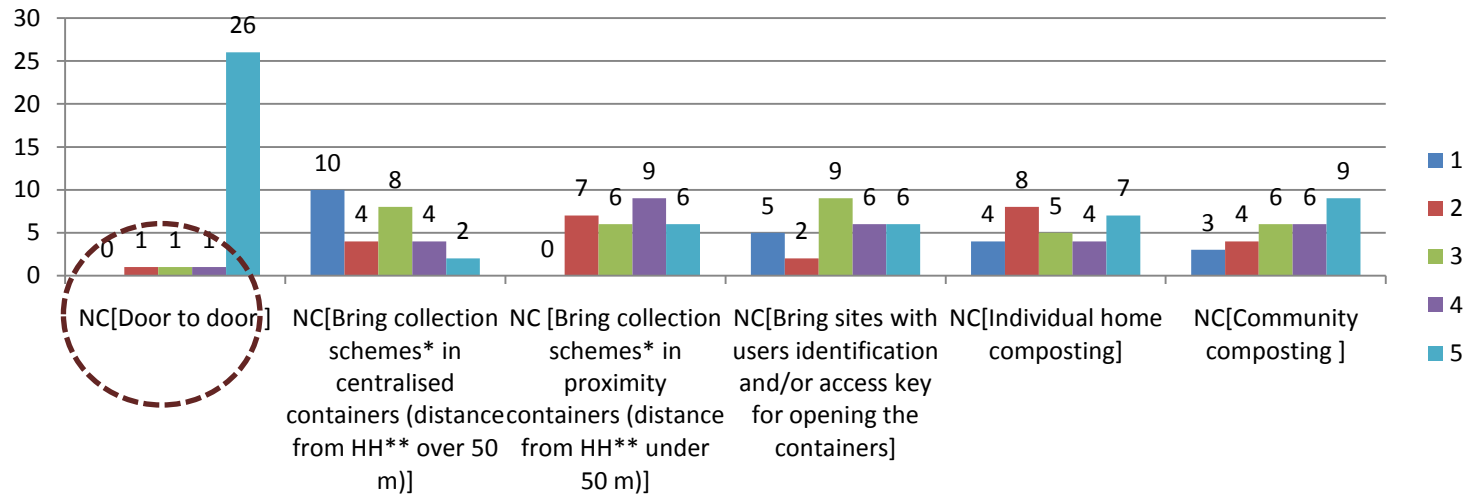

Source separated food waste

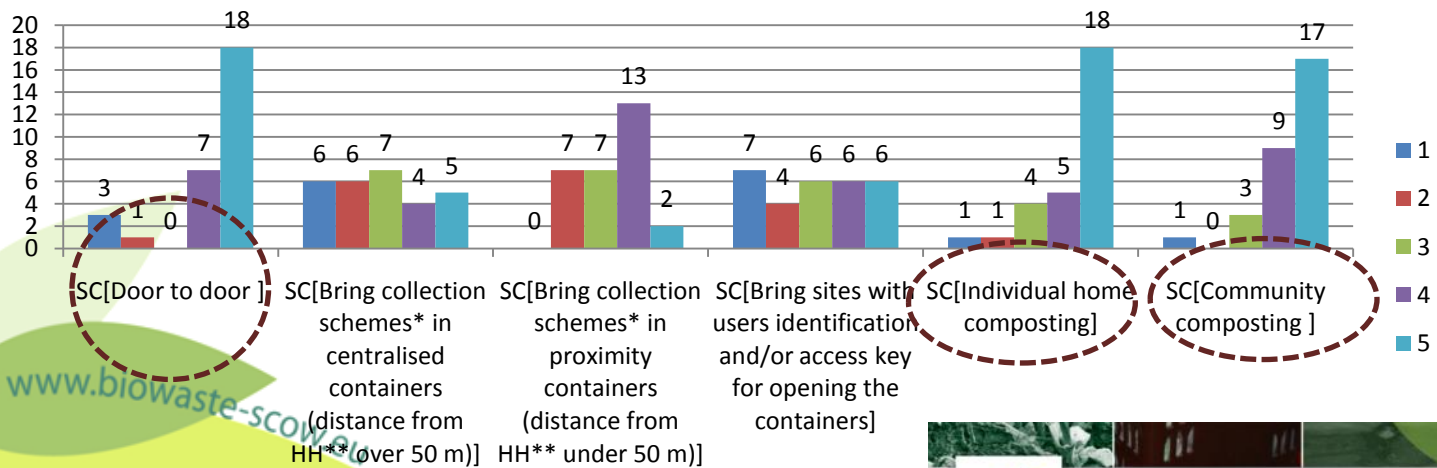

www.biowaste-scow.eu

4 - Which schemes for delivering food waste can be most effective to obtain a good quality and quantity?

Northern Countries

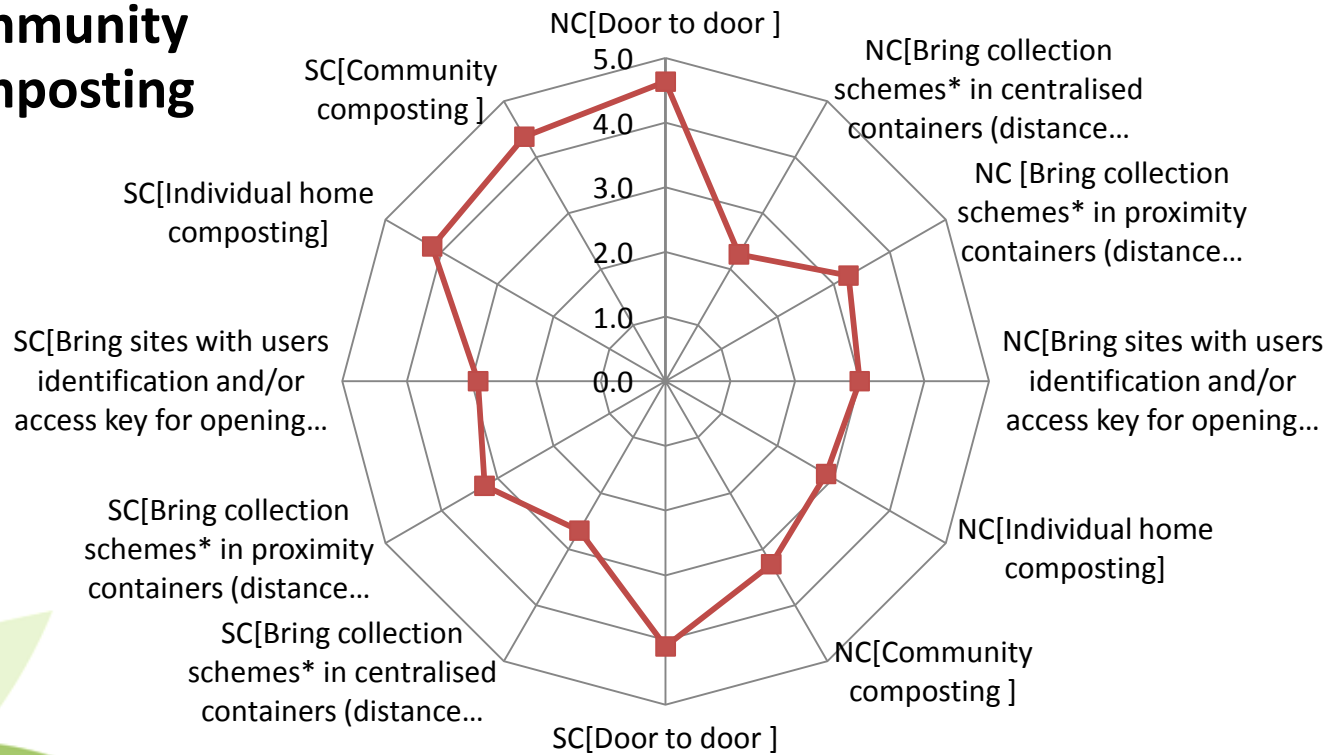

South Med Countries

www.biowaste-scow.eu

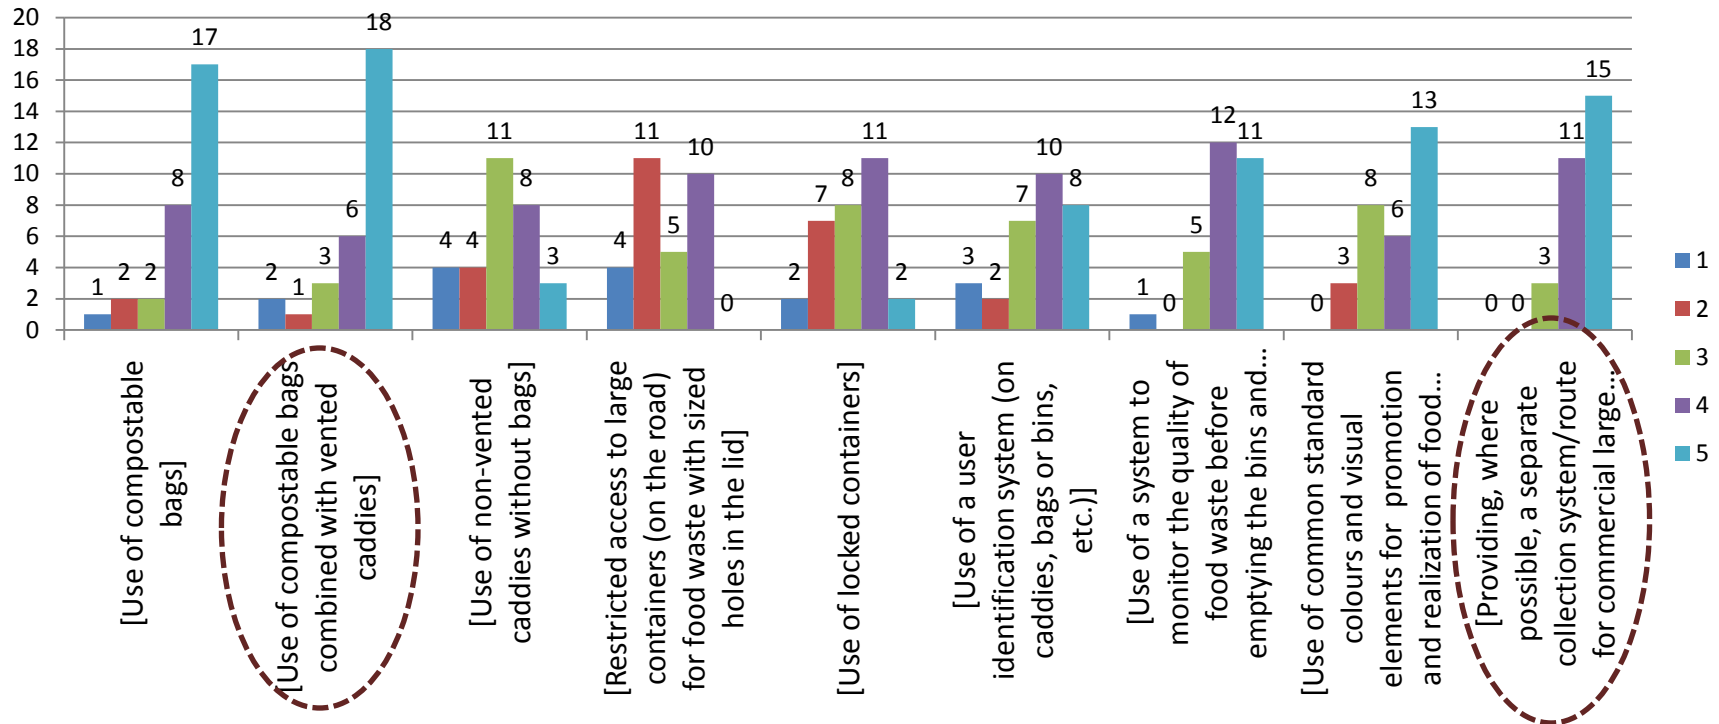

4 - Which schemes for delivering food waste can be most effective to obtain a good quality and quantity?

Door to door, SC home & community composting

www.biowaste-scow.eu

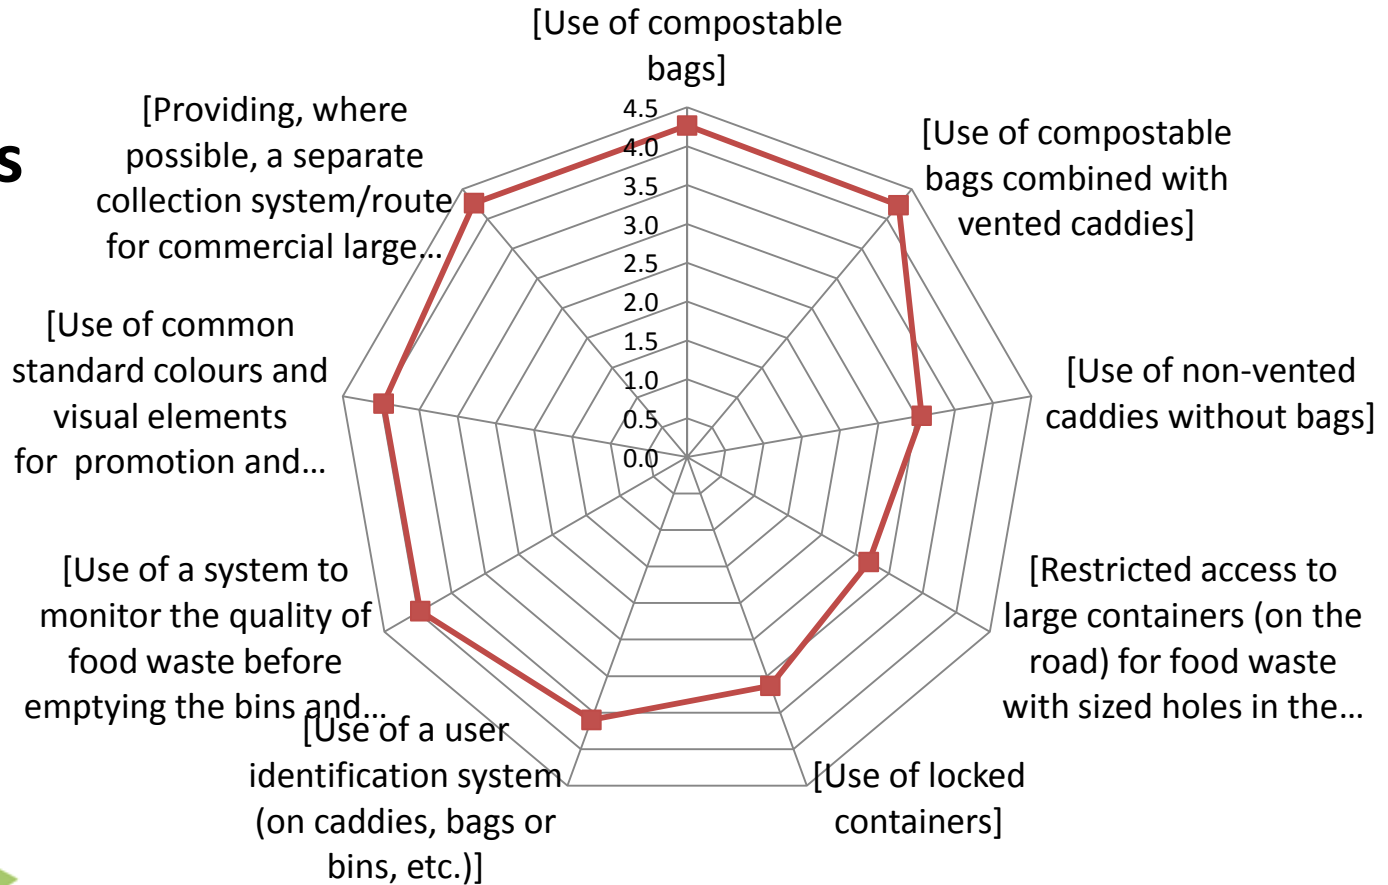

5 - Which tools are useful to enhance collection scheme by reducing impurities in the collected food waste?

www.biowaste-scow.eu

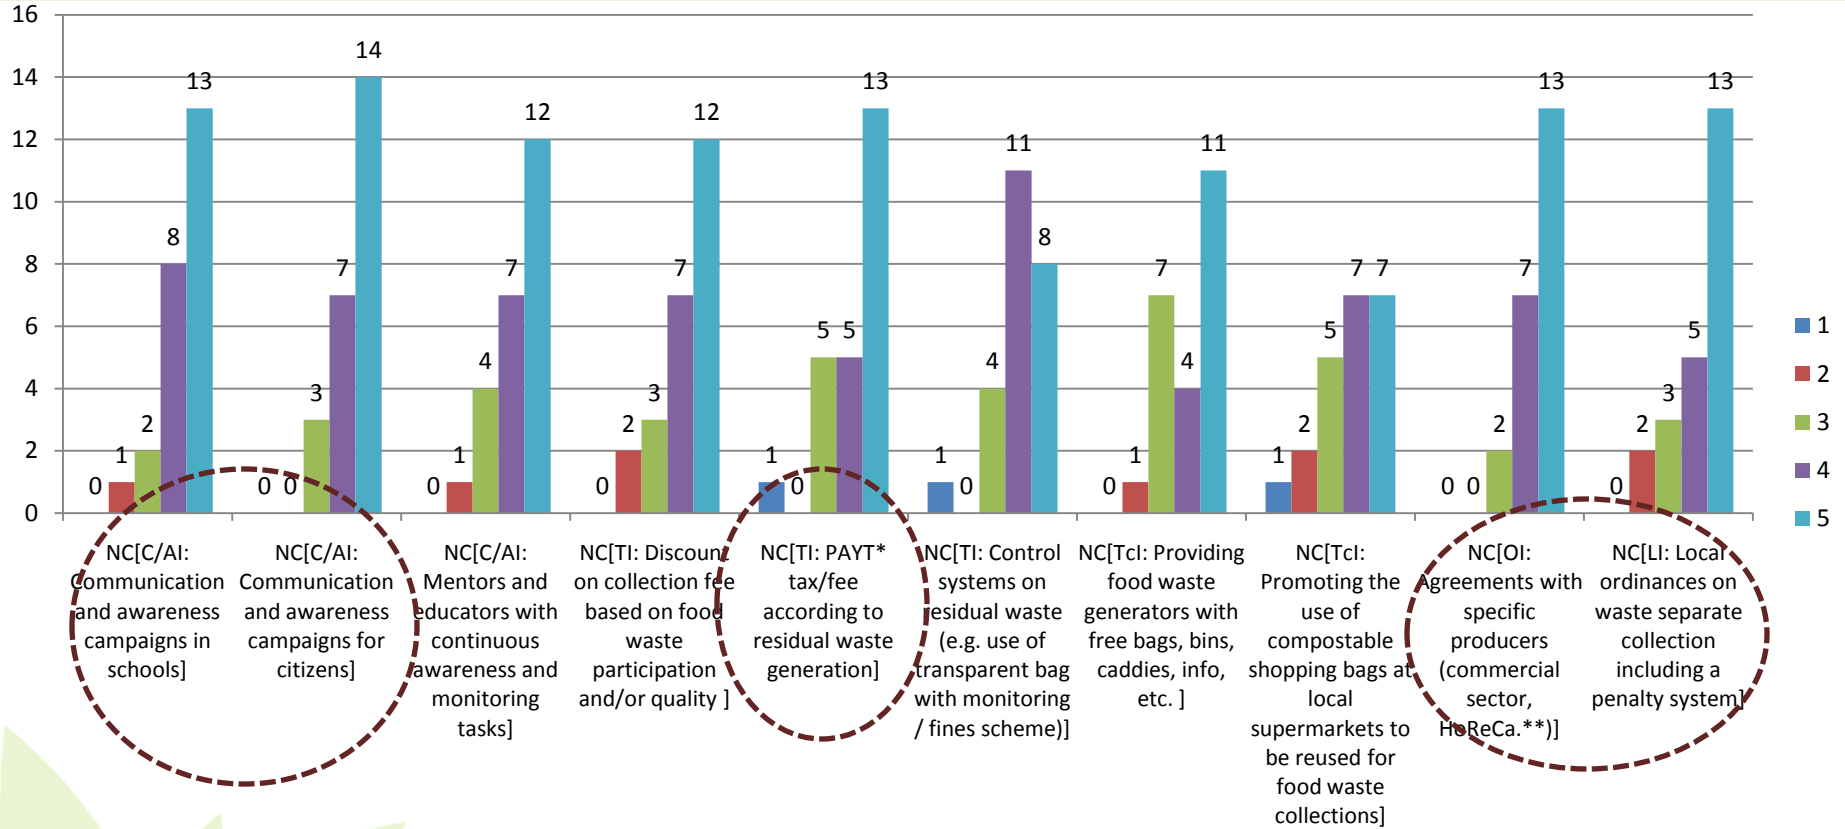

5 - Which tools are useful to enhance collection scheme by reducing impurities in the collected food waste?

Comp. bags, vented caddies

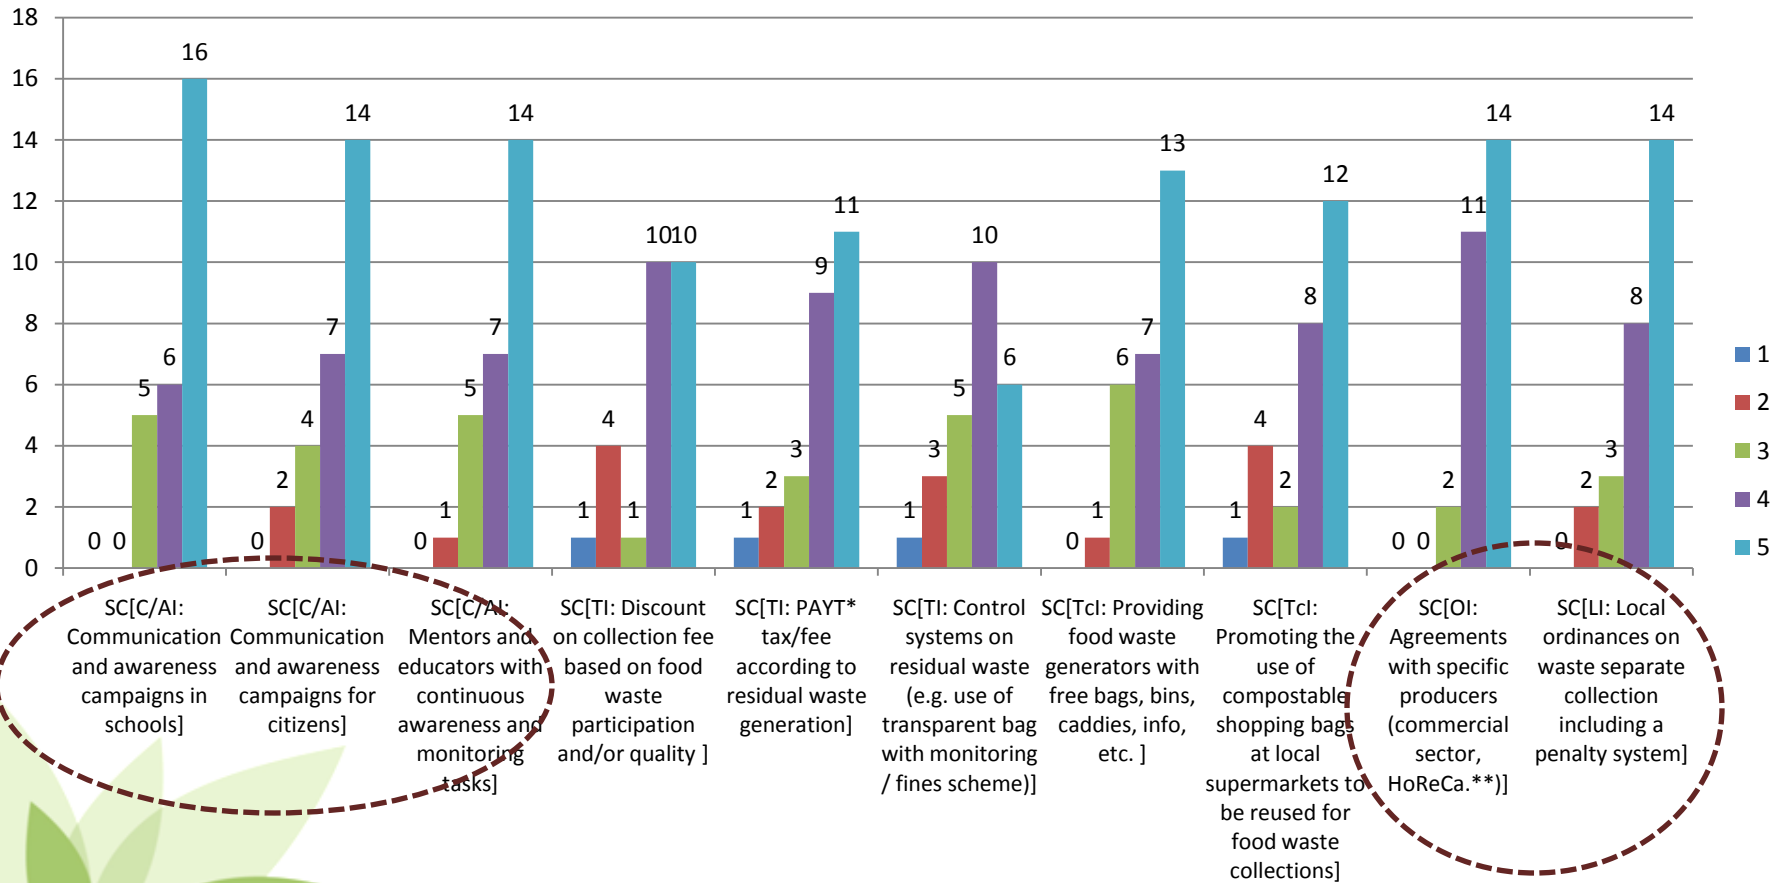

www.biowaste-scow.eu

6 - Which instruments at the Municipal level can be most effective to promote participation in food waste collection systems?

www.biowaste-scow.eu

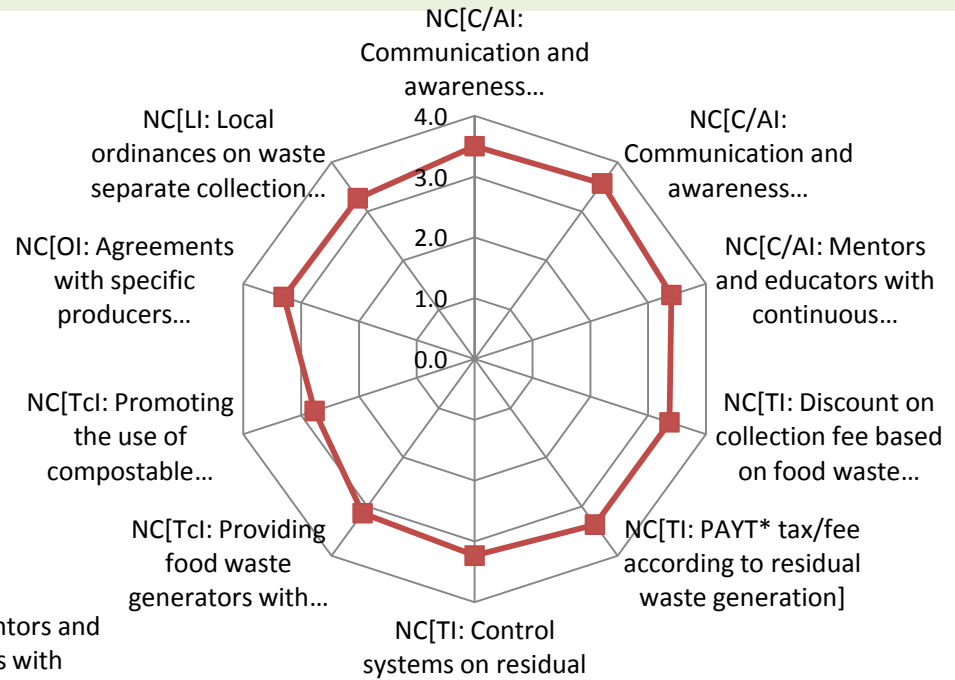

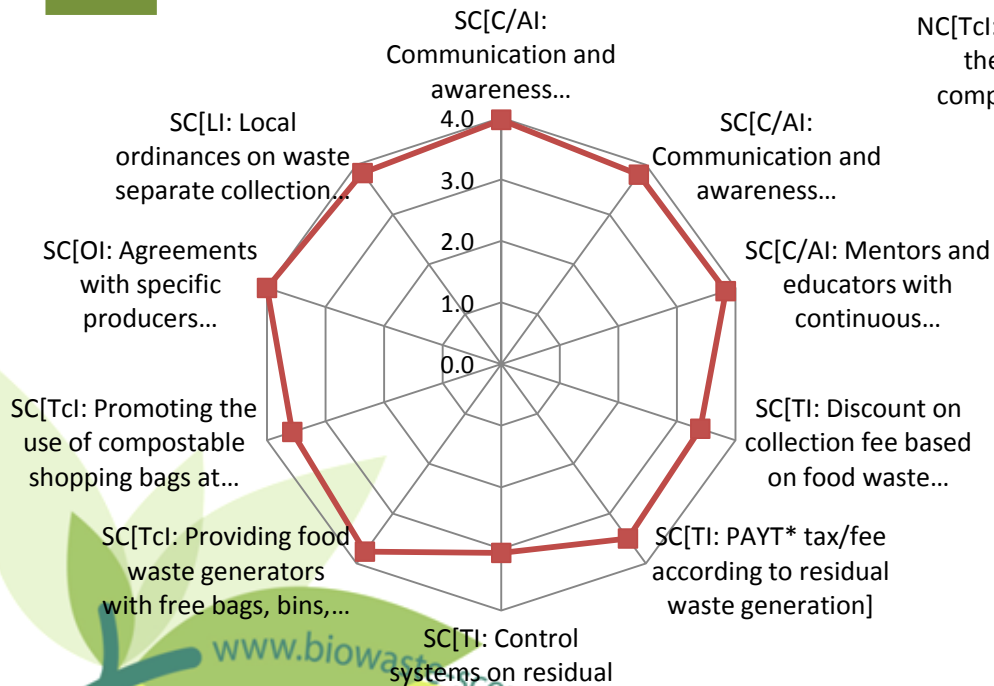

6 - Which instruments at the Municipal level can be most effective to promote participation in food waste collection systems?

www.biowaste-scow.eu

6 - Which instruments at the Municipal level can be most effective to promote participation in food waste collection systems?

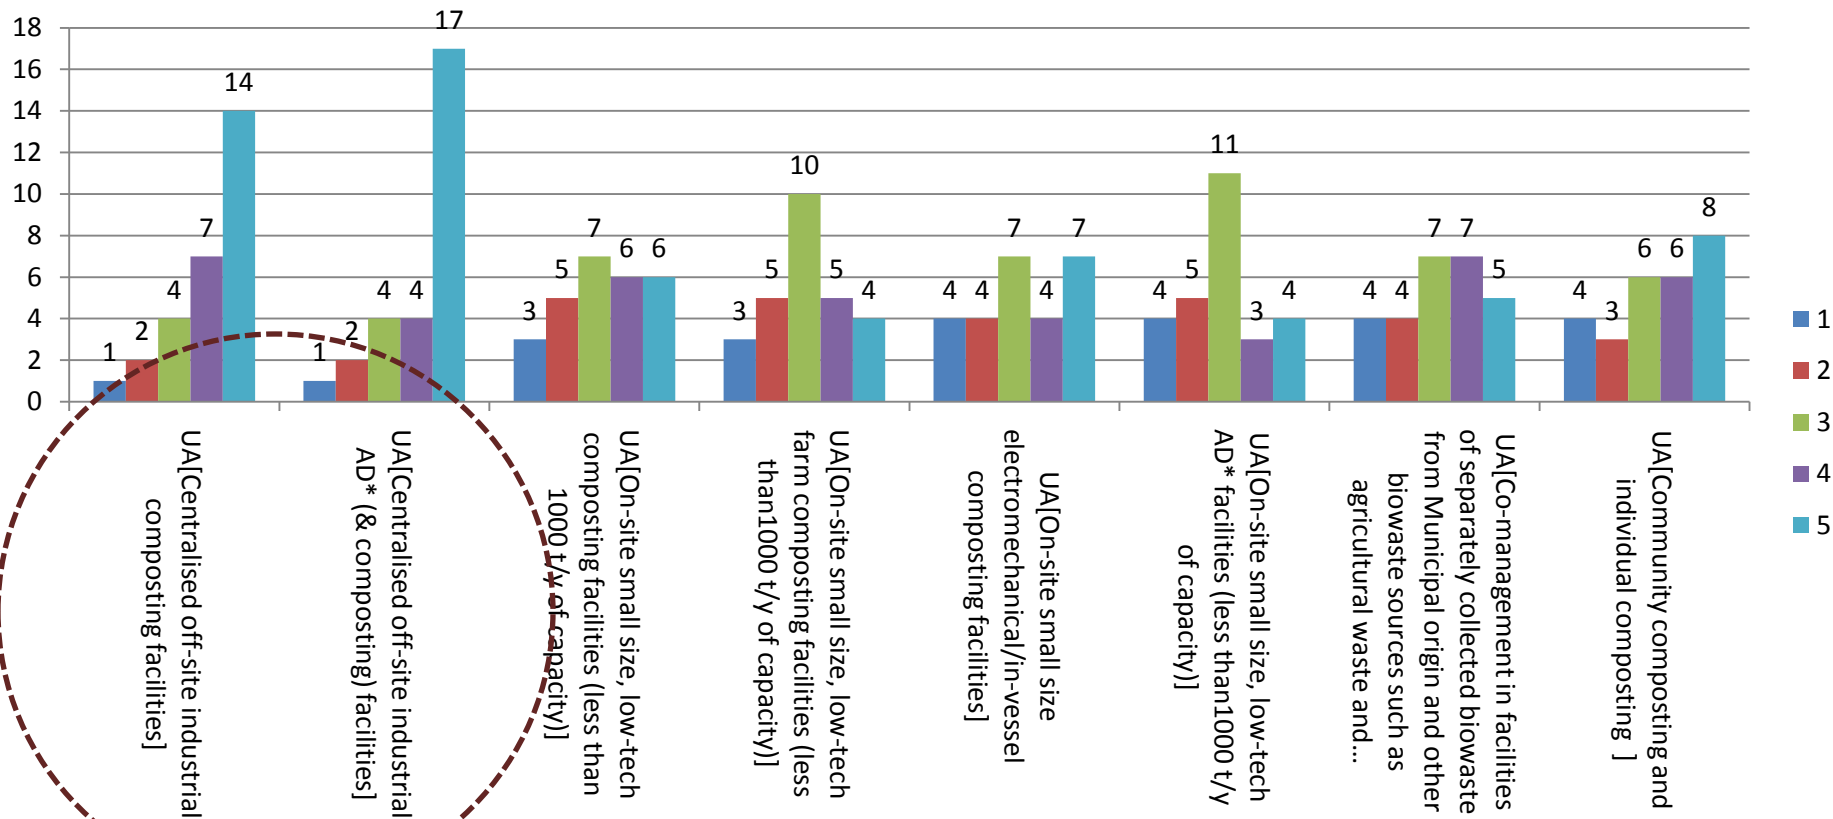

All combined instruments

www.biowaste-scow.eu

7 - Which systems can be the most effective for recycling biowaste (including food waste)?

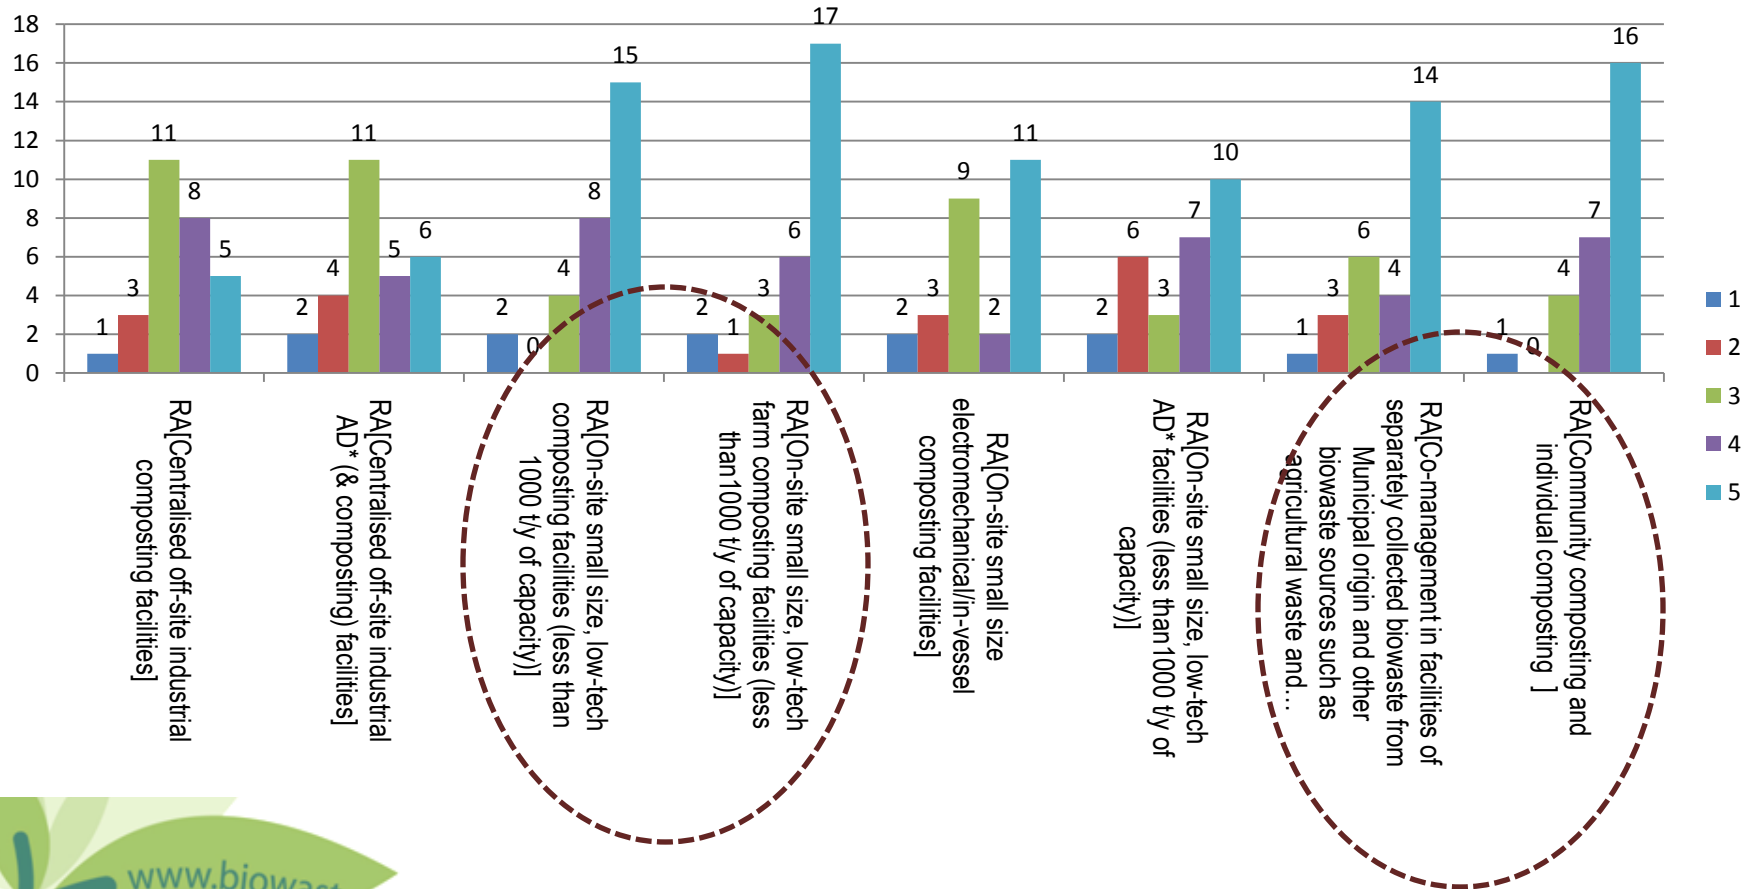

Urban areas

www.biowaste-scow.eu

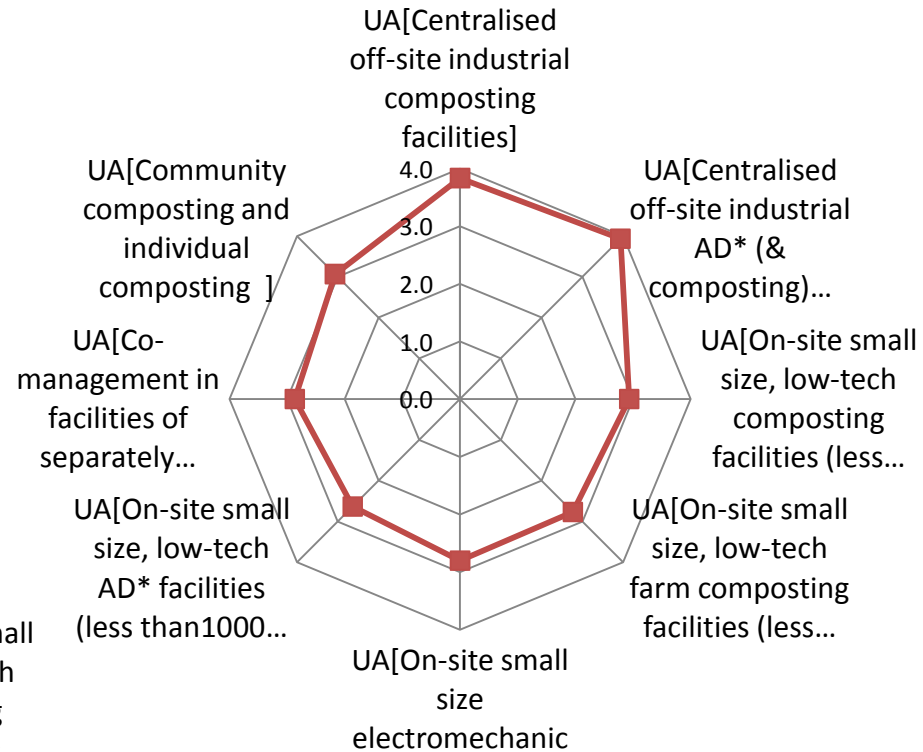

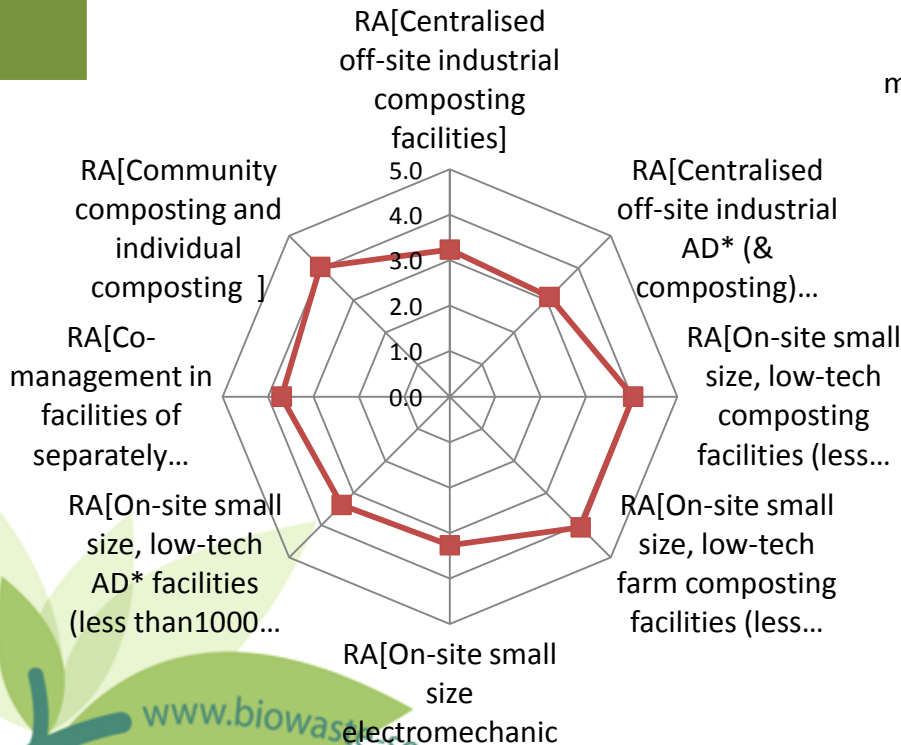

7 - Which systems can be the most effective for recycling biowaste (including food waste)?

Rural areas

7 - Which systems can be the most effective for recycling biowaste (including food waste)?

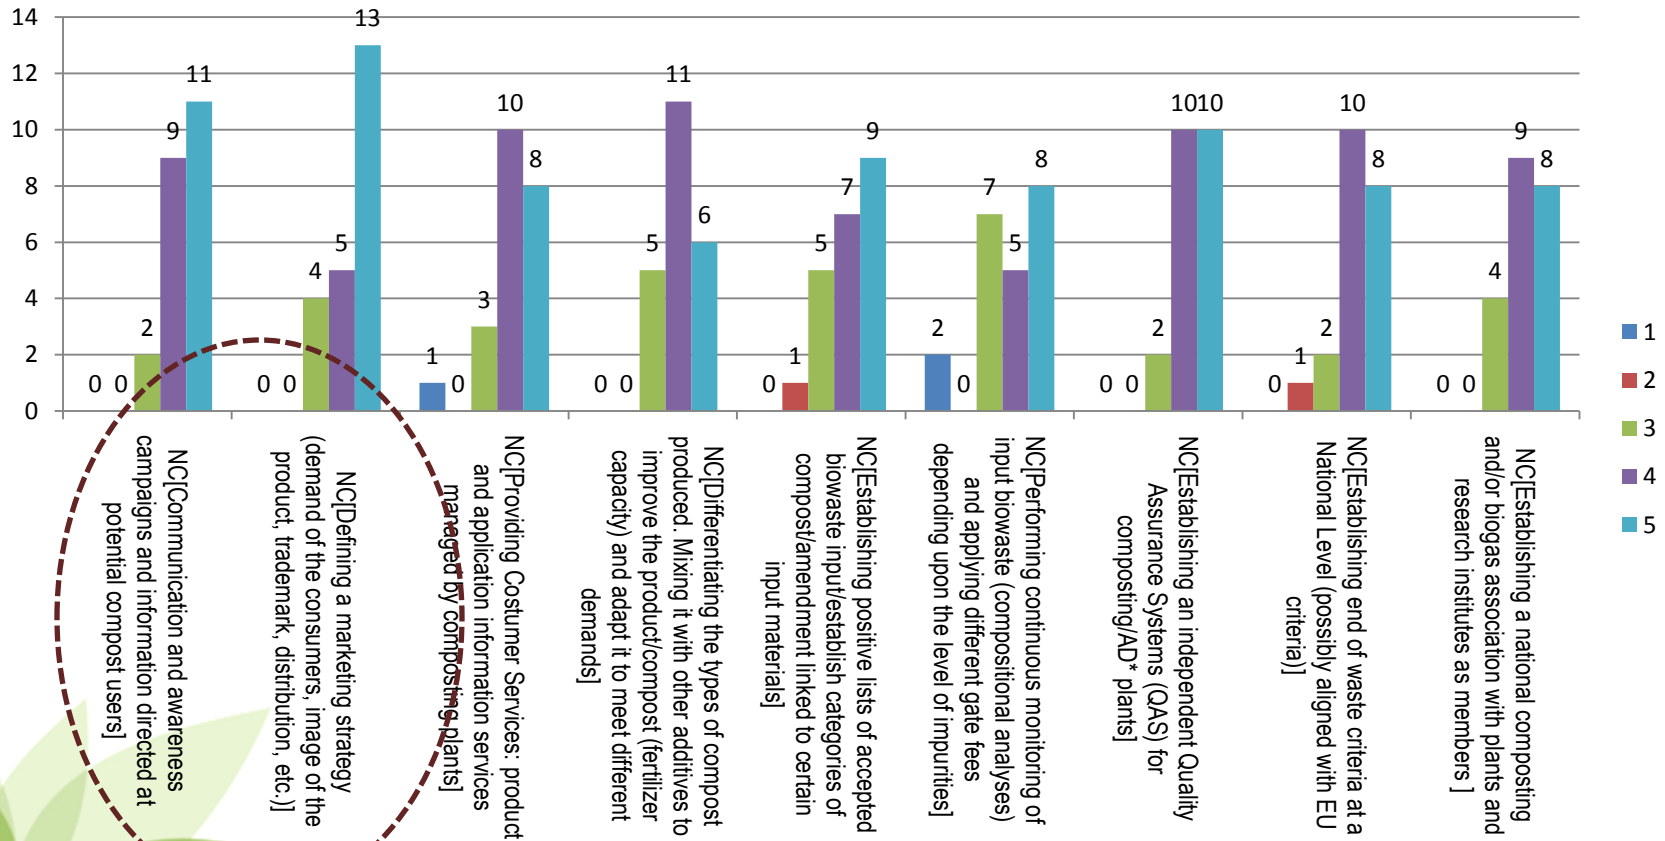

Different approaches... to be discussed

www.biowaste-scow.eu

8 - Which strategies can be the most effective to promote good quality compost and its use?

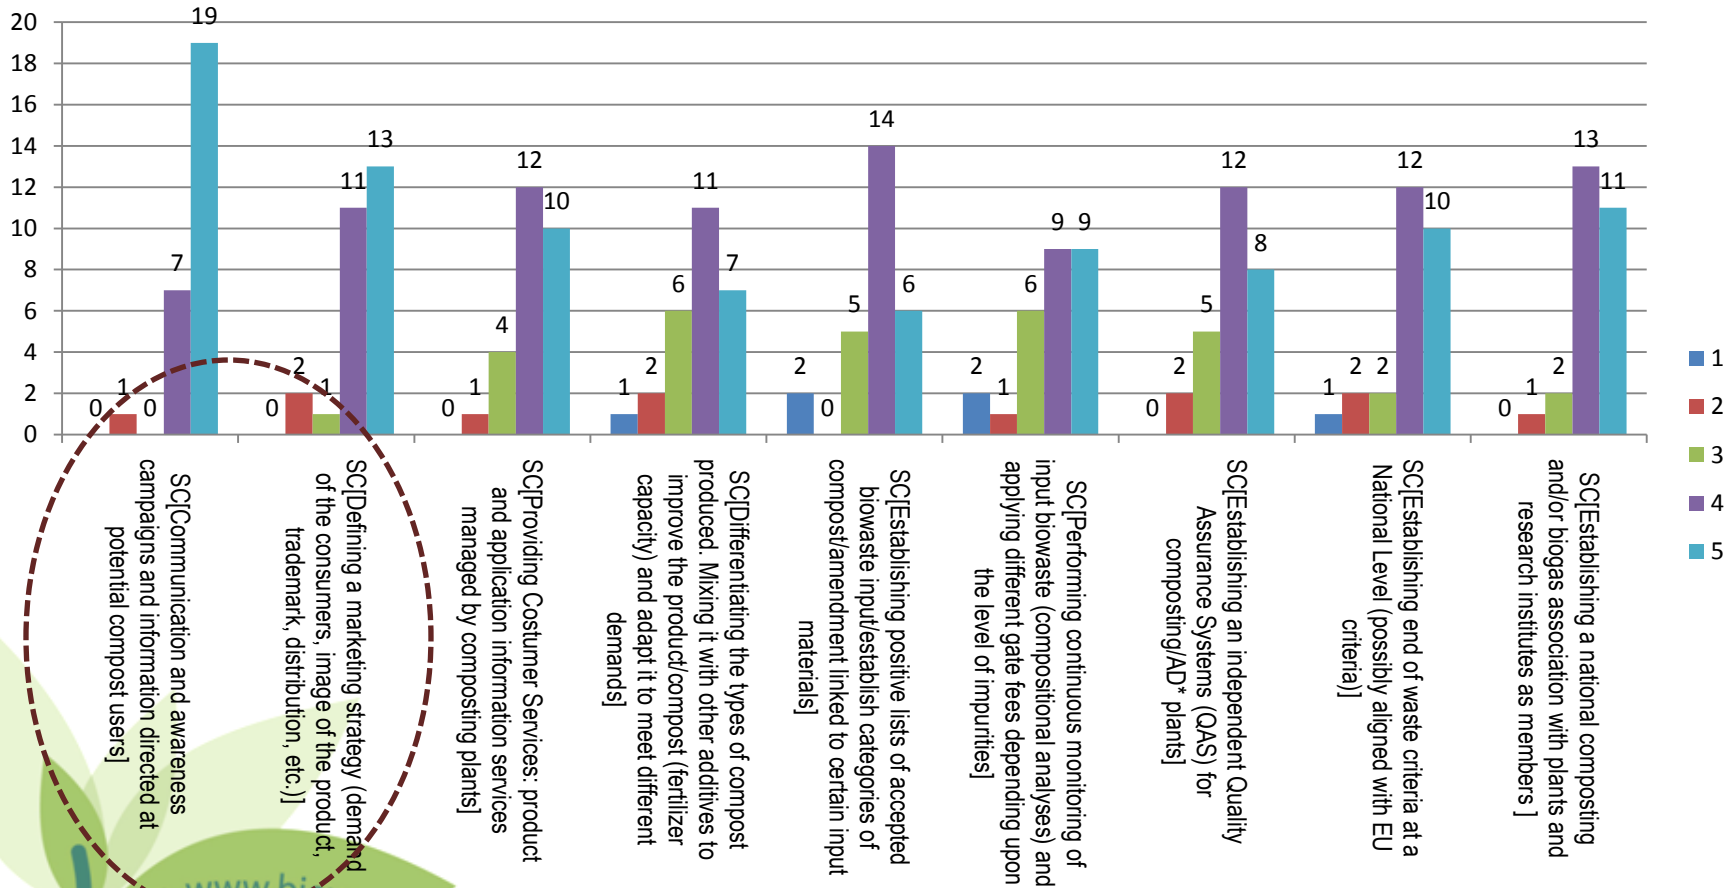

Northern Countries

www.biowaste-scow.eu

8 - Which strategies can be the most effective to promote good quality compost and its use?

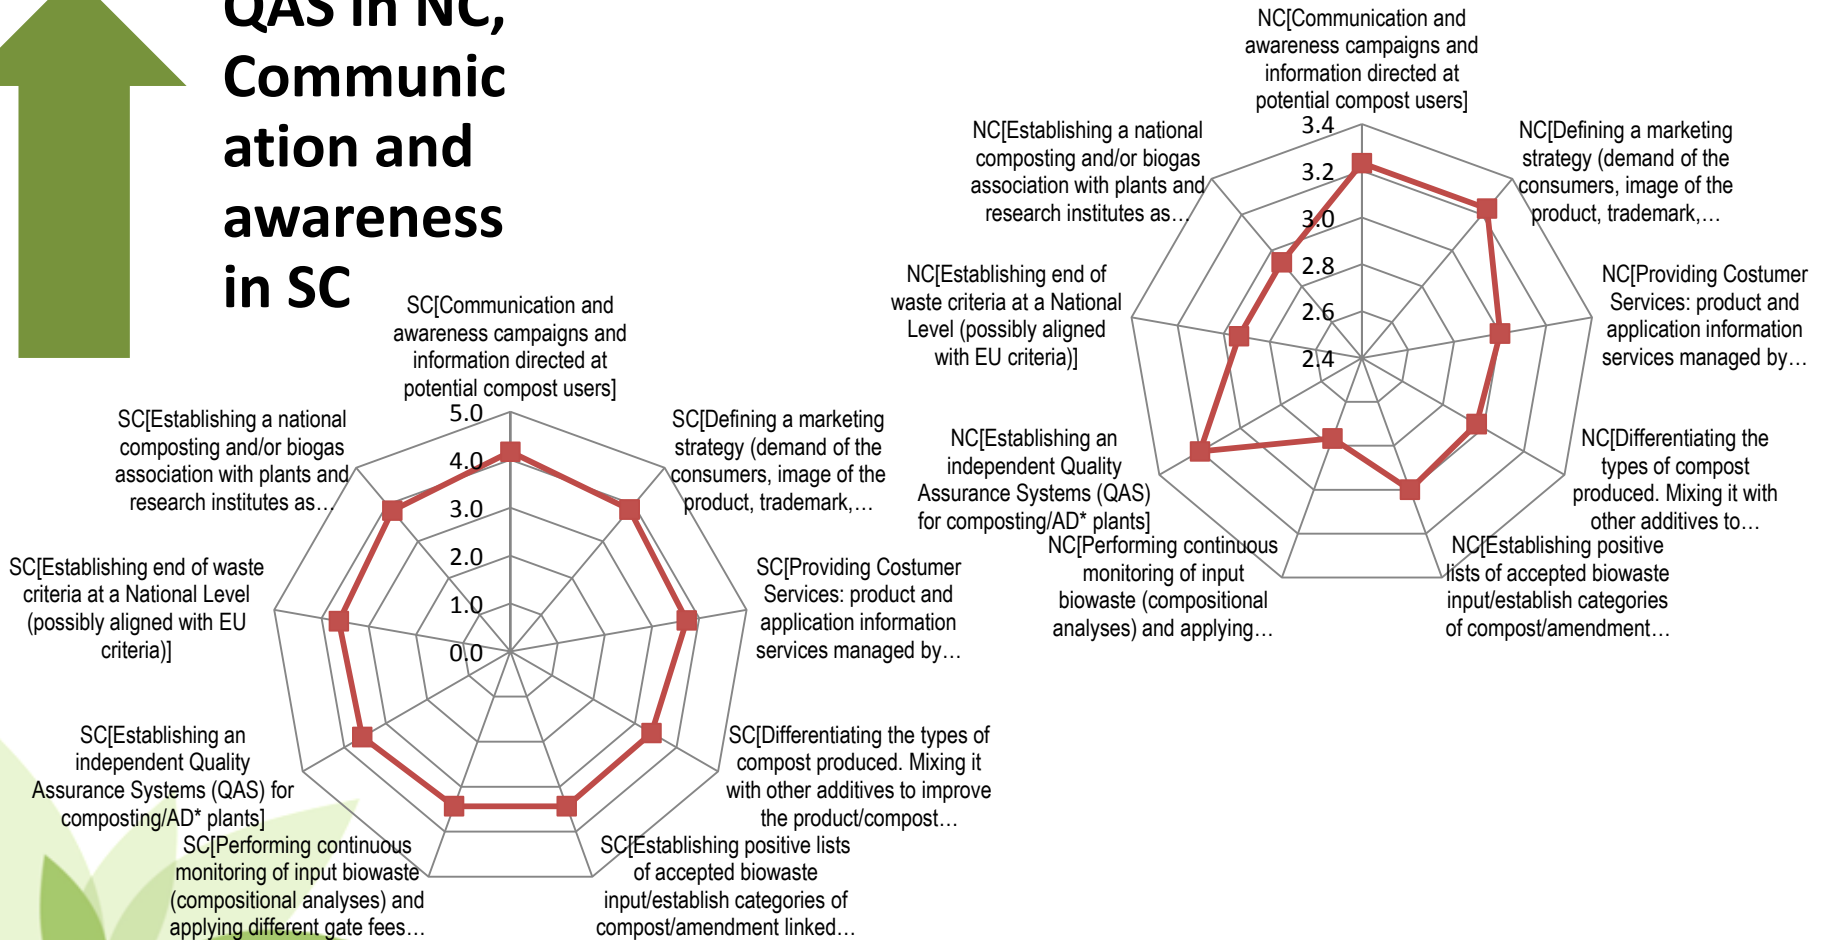

Southern Countries

www.biowaste-scow.eu

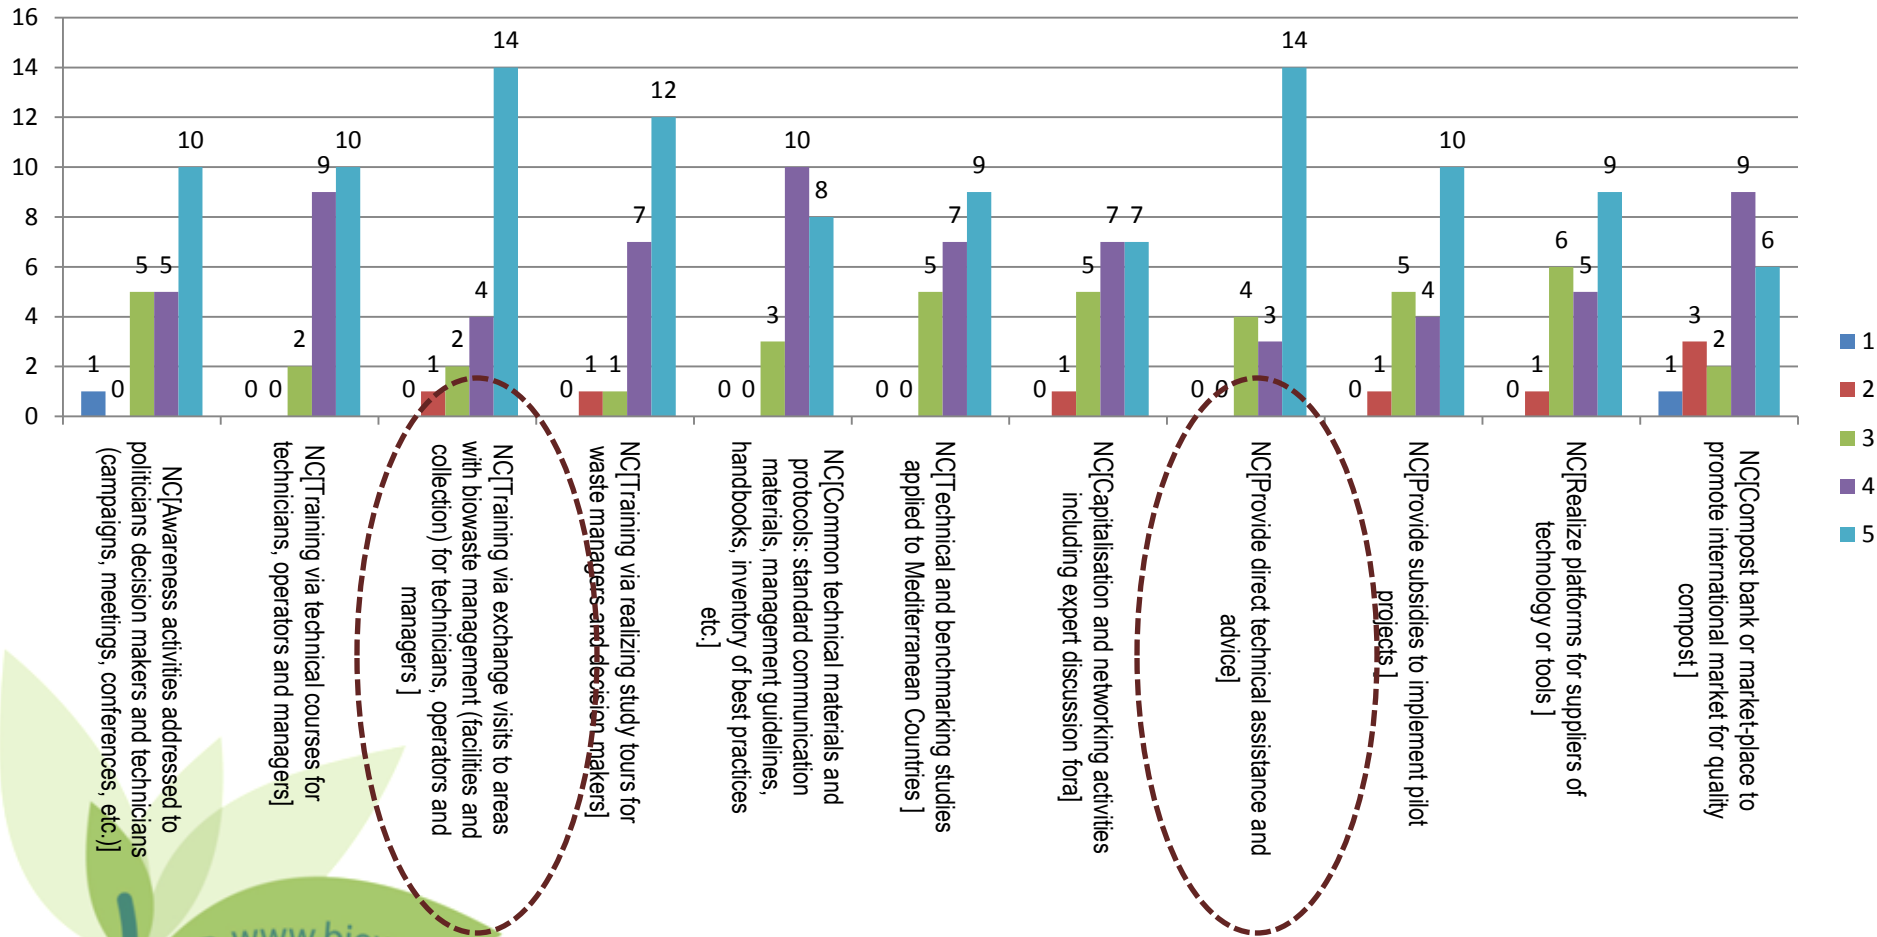

8 - Which strategies can be the most effective to promote good quality compost and its use?

QAS in NC, Communication and awareness in SC

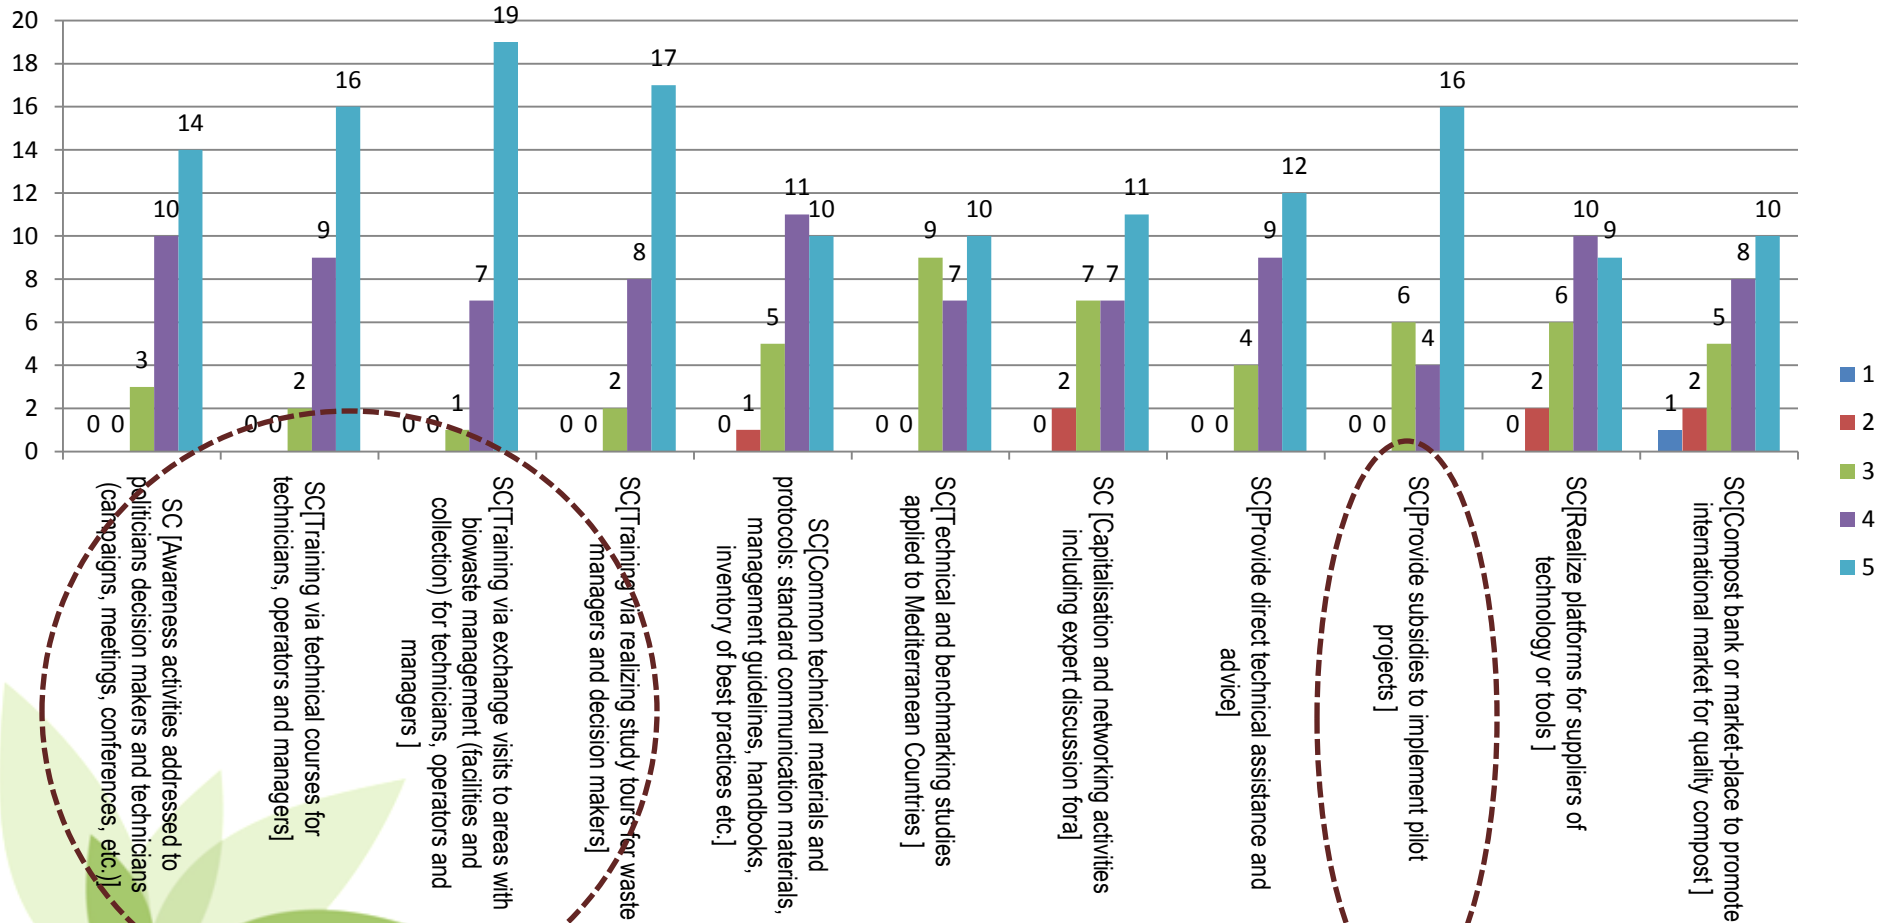

www.biowaste-scow.eu

9 - Which kind of collaboration with other Mediterranean countries can be necessary in order to improve biowaste management and co-ordinate strategies?

www.biowaste-scow.eu

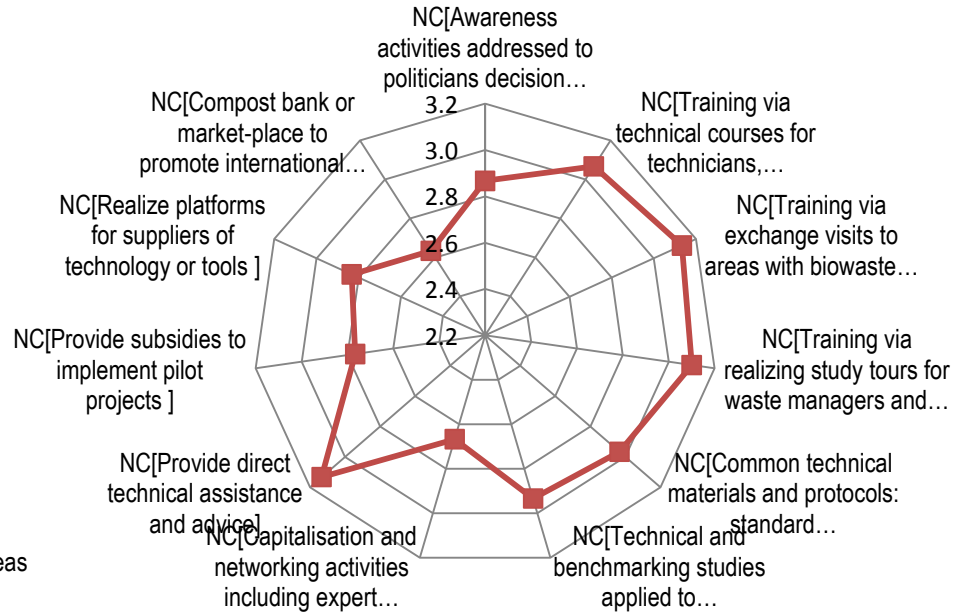

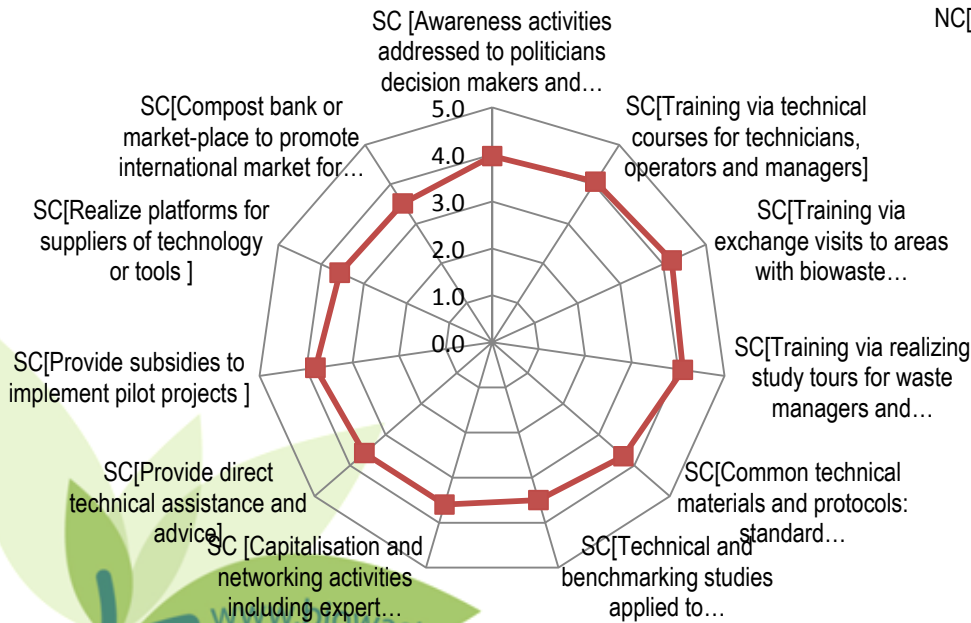

9 - Which kind of collaboration with other Mediterranean countries can be necessary in order to improve biowaste management and co-ordinate strategies?

www.biowaste-scow.eu

9 - Which kind of collaboration with other Mediterranean countries can be necessary in order to improve biowaste management and co-ordinate strategies?

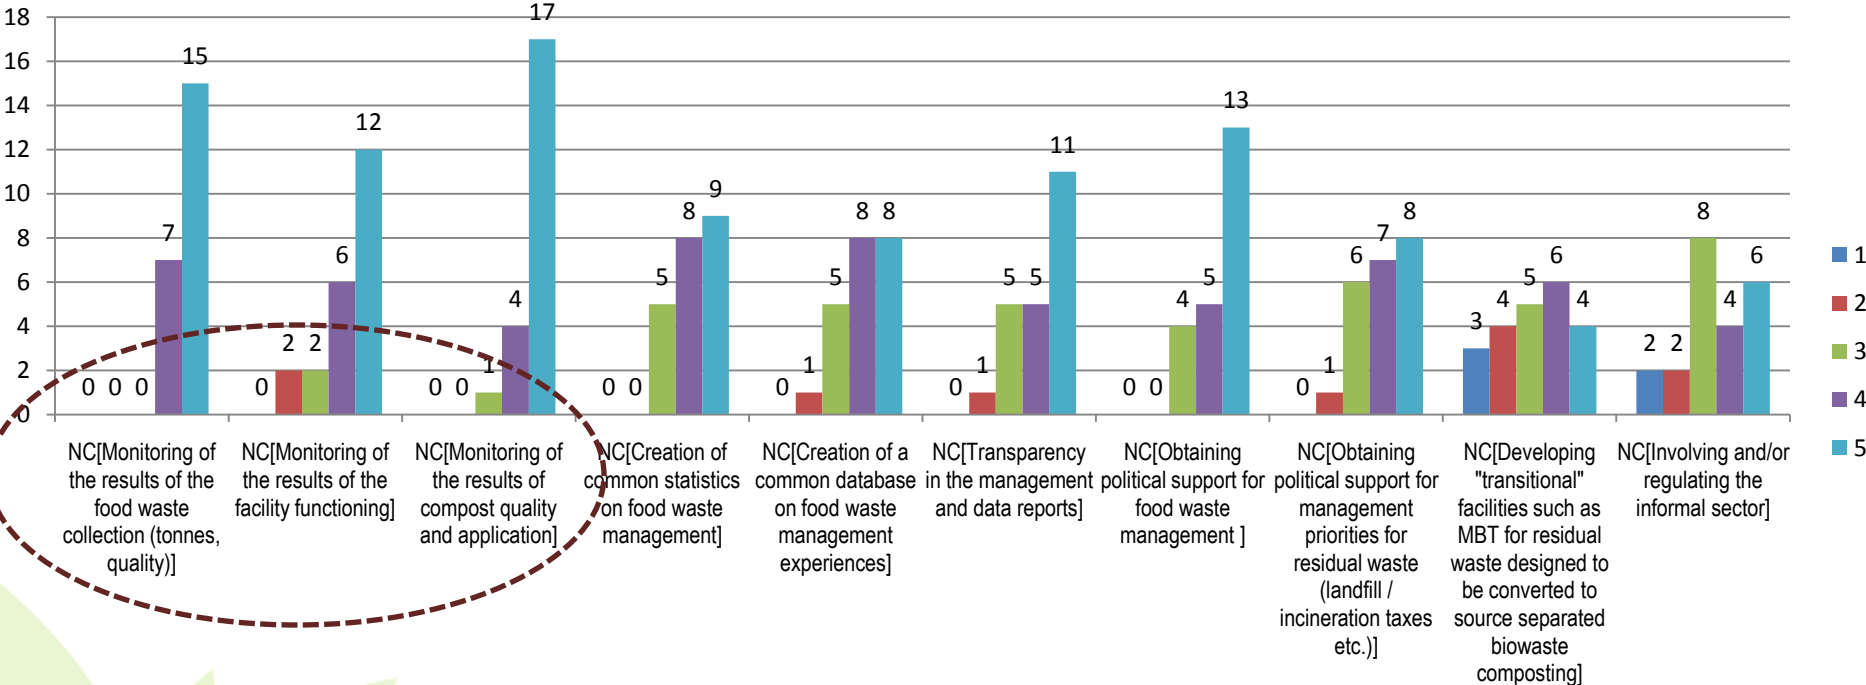

**training,
technical
assistance,
study tours**

www.biowaste-scow.eu

10 - Which other elements are would help to develop good food waste management models?

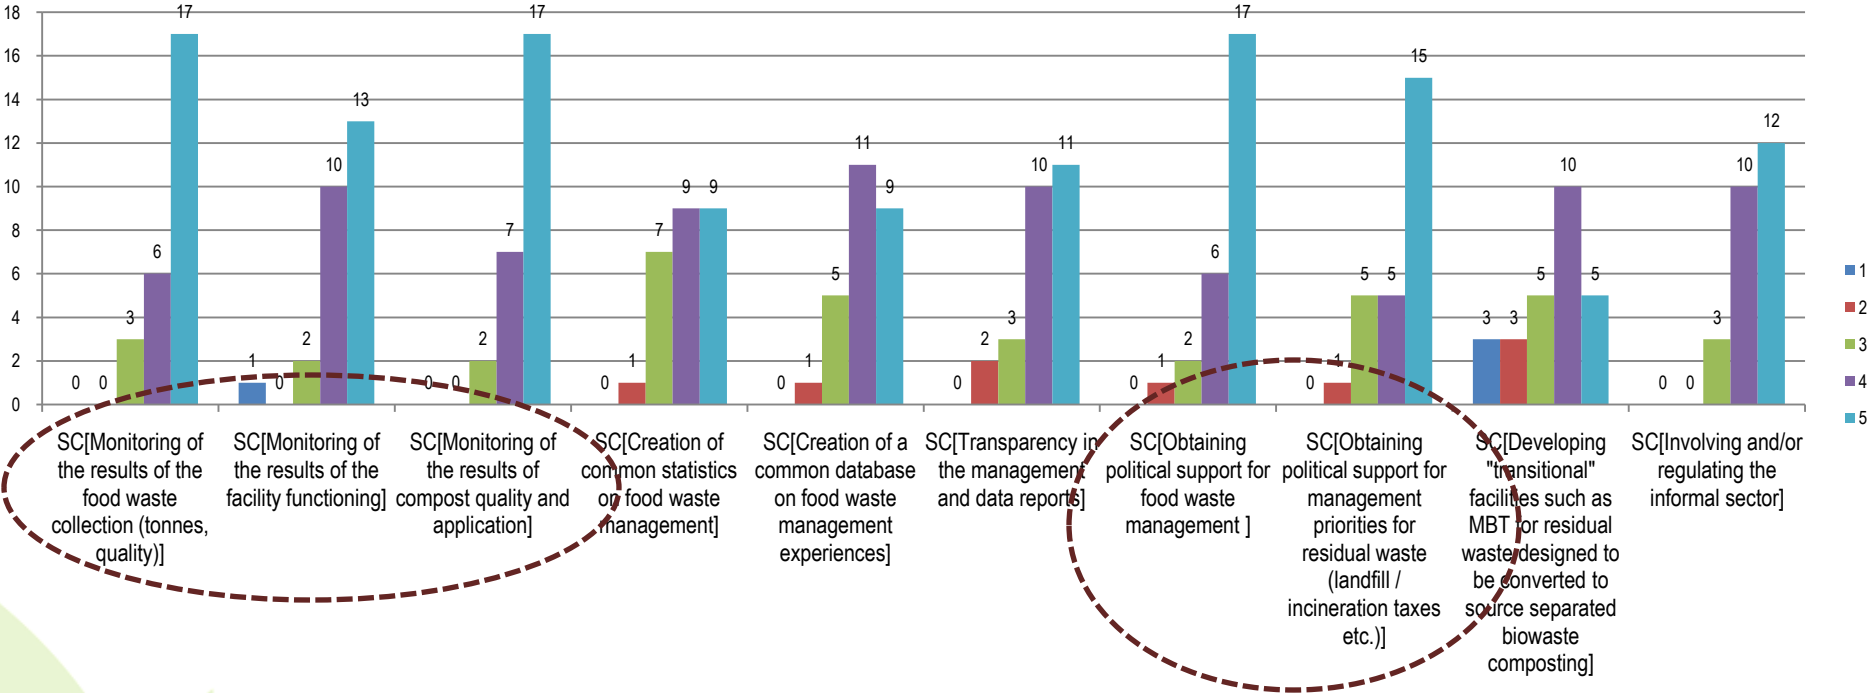

Northern Countries

www.biowaste-scow.eu

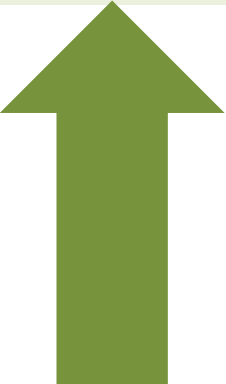

10 - Which other elements are would help to develop good food waste management models?

Southern Countries

www.biowaste-scow.eu

10 - Which other elements are would help to develop good food waste management models?

monitoring and political support
